SUMMARY

Data & Business Intelligence Analyst with 5 years of experience in healthcare, finance, and operations analytics using SQL, Python, and SAS. Skilled in data analysis, requirements gathering, data quality, and Power BI/Tableau reporting.

PROFESSIONAL EXPERIENCE

Data Analyst – Healthcare Analytics | *ML Technologies*

May 2022 – Present

- Analyzed 12M+ healthcare claims and eligibility records using SAS and SQL in Snowflake, applying exploratory data analysis and statistical techniques to identify utilization and cost trends supporting monthly cost and coverage assessments.
- Automated 7 recurring healthcare reporting workflows using Python and scheduled data pipelines to extract, transform, and refresh Tableau reports, reducing reporting delivery time from 3 days to under 1 day.
- Delivered 6 production Power BI dashboards with data-driven measures, KPI reporting, and interactive visualizations, enabling 15+ clinical and operations stakeholders to monitor utilization, cost, and performance metrics during scheduled business reviews.
- Improved healthcare claims data quality by validating ICD and CPT codes, performing record-level data analysis and reference-table reconciliation, and resolving 19 data inconsistencies before internal and external reporting submissions.
- Identified enrollment and utilization trends across 8 healthcare businesses through time-series analysis and seasonality assessment of AWS S3 datasets, providing insights for quarterly performance and cost reviews.

Data & Analytics Engineer | *Infosys*

Jan 2022 – Aug 2023

- Conducted 10 requirements-gathering sessions with 12 stakeholders, identifying 6 reporting gaps and defining 20+ KPIs, reporting requirements, and acceptance criteria for dashboard enhancements.
- Redesigned 4 Power BI dashboards with clearer KPI summaries, trend comparisons, and drill-down views, incorporating stakeholder feedback across 3 review rounds to explain performance changes and support monthly business reviews.
- Reduced onboarding time and recurring support requests by 50% by standardizing data dictionaries, reporting documentation, and user manuals for analytics pipelines, improving knowledge transfer across cross-functional teams.

Associate Data Analyst | *Genpact*

Jan 2020 – Dec 2021

- Reduced operating costs by 8% by analyzing pricing, cost, and revenue data in Excel using PivotTables and lookup functions, identifying cost drivers and data discrepancies, and delivering actionable recommendations to business owners.

PROJECTS

OR Scheduling Reliability & Cost Exposure | Power BI, SQL, Python, Microsoft Fabric, PySpark | [GitHub repo](#)

- Built an end-to-end ELT pipeline in Microsoft Fabric using PySpark and Spark SQL, transforming 1.9M+ raw records into a 48,118-case, 418-procedure star schema and Power BI/DAX semantic model that quantified a 54.1-minute mean absolute error and \$15.8M–\$27.1M in estimated annual cost exposure.

Medicare-Claims-Processing-Analytics | PostgreSQL, SQL, Python | [GitHub repo](#)

- Analyzed 6,627 Medicare claims across 3 approval policies (manual, rules-based, and checks-plus-score) using SQL, PostgreSQL, and Python; identified 100 incorrect approvals and generated \$73,194 in net savings compared with manual review.

SKILLS & CERTIFICATION

- **BI & Visualization:** Power BI, DAX, Power Query, Tableau, Advanced Excel, KPI Reporting, Semantic Models, Star Schema
- **SQL & Programming:** SQL (Joins, CTEs, Window Functions, Aggregations), Python, Git
- **Databases & Cloud:** Snowflake, Microsoft Fabric, BigQuery, SQL Server, PostgreSQL, Oracle, MySQL, PySpark, Spark SQL
- **Data Management:** Data Validation, Data Quality, Data Reconciliation, Data Cleaning, Requirements Gathering, ETL/ELT
- **Data Analysis:** SAS, Statistical Analysis, Exploratory Data Analysis, Trend Analysis, Time-Series Analysis
- **Certification:** Microsoft Certified Fabric Analytics Engineer Associate (DP-600)

EDUCATION

Master of Science in Information Systems | Saint Louis University, St. Louis, MO

Aug 2023 – May 2025
